

# CYBERSECURITY TRAINING

WATCHHUNTDEFEAT

## TRAINING PROCESS

### Technical Training

Develops technical skills related to cybersecurity tools, techniques, and technologies, such as vulnerability scanning, penetration testing, or incident response.

### Compliance Training

Helps meet regulatory requirements for cybersecurity, including data protection, industry standards, or internal security policies.

### Leadership Training

For managers to make strategic cybersecurity risk decisions, incident response planning, and security governance.

### Incident Response Training

Prepares to respond to cybersecurity incidents, including detection, containment, recovery, communication, and coordination with stakeholders.

### Awareness Training

Educates staff about cybersecurity risks such as phishing, password management, and social engineering tactics.
