CATALISTO

MANAGED DETECTION AND RESPONSE

WATCH**HUNT**DEFEAT

MAJOR FEATURES AND CAPABILITIES

- Propietary Technology stack for SIEM
- Detection and Prevention
- Incident Response and Forensicts Analysis
- Active Defense Leveraging Threat Intelligence & Hunting
- Managed Endpoint Detection & Response (EDR)
- Regulatory Compliance & Reporting
- Ease of Implementation & False Positive Reduction
- Security Advisors and SOC Personnel

24/7 monitoring and threat detection

We continuously monitor your IT and OT infrastructure for suspicious activity and identify threats in real-time.

Threat containment and remediation

We contain and neutralize threats, and help you restore normal operations and implement necessary controls to prevent future attacks.

Rapid threat investigation

Our security specialists quickly determine the nature, scope, and impact of detected threats to minimize disruption.

Threat hunting and analysis

Human analysts proactively search for hidden threats using advanced threat intelligence, behavioral analysis, and data mining techniques

Vulnerability management

We continuously scan your IT and OT infrastructure for vulnerabilities, prioritize them, and work with you to swiftly remediate them.

Security analytics and reporting

We regularly report on your security posture, threat trends, and security investments to inform decision-making and demonstrate compliance.
