# STRATEGIC GUIDANCE
WATCH**HUNT**DEFEAT

STRATEGIC GUIDANCE PROCESS

We provide cybersecurity strategy services that guide your organization as a whole – across people, processes and technology – to your security objectives:

Security Architecture

We help design and implement a secure infrastructure, network, and application architecture, including access controls, data encryption, and application security.

Cybersecurity Governance

We develop policies and procedures for managing cybersecurity risks, including roles, risk management, and incident response plans.

Compliance Management

We ensure your cybersecurity strategy aligns with regulatory requirements and industry standards.

Program Development

We develop a comprehensive cybersecurity roadmap and plan to achieve the cybersecurity goals that align with your business objectives.

Budgeting

We help develop a realistic cybersecurity budget that addresses your organization's unique needs without compromising other objectives.

Procurement Assistance

We assist in selecting the best cybersecurity tools and software that meet your needs and provide value for your investment.
